A regular payment history with your utility provider is critical. You can easily manage your account on-line. DTE customers can log onto [www.my.dteenergy.com/myAccount/](http://www.my.dteenergy.com/myAccount/). From there you can report actual meter readings, check account balances and even pay your bill! First time users will need to register and give themselves a password.

**Get the whole family involved** in reducing your household utility bills. Hold a family meeting where bills are shown and ways to reduce usage are discussed monthly. Small rewards for reduced bills are a great motivator. Young children can be designated “Captain Energy”, who’s duty it is to turn off lights when they are not in use. Older children and teens can help chart bills and make small repairs such as; caulking and putting up window kits. Everyone can check out further ways to reduce energy by logging onto [www.my.dteenergy.com/myAccount/](http://www.my.dteenergy.com/myAccount/) or [www.warmtraining.org](http://www.warmtraining.org).
